Its Just Cool: The NailOut

By Benjamin Johnson

What do you get when you cross a cat's paw with an air chisel? The NailOut. Powered by compressed air, the NailOut drives the claw underneath the nail and removes it up to ten times faster than an ordinary cat's paw. To get the full effect you need to check out the video [here](#).

The NailOut connects to your compressor with a standard 1/4" inlet and draws up to 4 CFM to deliver 4,600 blows per minute. If you need to remove 200 nails in a hurry, this is the tool for you. Check out the NailOut on Amazon for \$150.
